That would be great! Thanks Laurie, I made maps for the regional office's presentations last year so I can do that for the Deschutes and Columbia. I'll send you a copy of a couple of the region's presentations from last year so you can get an idea. Then you can use those to generate your slides if that works. I'll get the example presentations to you tomorrow at the latest.

If you send your slides to me in advance but stay in Seattle, you'll just need to tell me when to advance slides. Thanks again and I'll be in touch.

Sincerely,
Lara

Lara, Ben & Melissa - - Good idea. We are happy to provide a couple slides for the Deschutes & Columbia River temperature TMDLs. We could provide the slides to you before-hand so that we don't have to mess with screen sharing. Thanks,
Laurie

Subject: TMDL Prioritization webinar question
Importance: High

Hi Laurie,

At the A-Team meeting on Monday, it was suggested that I reach out to EPA Region 10 re: presenting for the October 30 Public TMDL Prioritization webinar on the TMDLs that EPA is developing for us (Deschutes,

Columbia River). We think it would be really great for the public to get a full picture of the work that's being done in the State and we hoped someone from Region 10 would be able to speak to those TMDLs.

I have a presentation template from last year's webinar and can share it if you think an EPA representative could in fact participate by presenting for the webinar.

If EPA can present, here are some important dates: We have a dry run scheduled for Wednesday October 24 at 10am and the actual public webinar is Tuesday October 30 at 10am.

There are some logistical things with screen sharing if you do think presenting is something that could be done, however, those logistics become null if whomever presents can come here to Lacey and run their presentation through my computer.

In the meantime, I'm still going to look for a time for you, Ben and I to discuss the settlement agreement, although that's getting into the busy webinar preparation time for me. I'll be looking at Ben and I's calendars when I get a chance.

Let me know what you think about the webinar when you have an opportunity. Thanks!!
